### Independent Testing Laboratories, ITL Boulder

**Sapphire Technical Solutions (STS) will now be maintaining Type C Goniophotometers for the Commercial Lighting Industry.**

STS is excited to be expanding into the Commercial Lighting Industry with the purchase of Independent Testing Laboratories (ITL Boulder) goniophotometer & integrating sphere sales and service business. STS is currently a leader in photometric equipment, specifically Type A Goniophotometers. We are eager to begin managing the upgrade, support, service and new sales of the Type C Goniophotometers for ITL's customers.

"On behalf of ITL, I am pleased that Sapphire Technical Solutions will continue to provide sales, service and support of ITL's goniophotometer and integrating sphere systems. After visiting the STS facility and meeting with key members of their staff, I am confident that they will do a fine job supporting ITL's test systems for many years to come."

- Bob Berger, ITL President
